Senior Software Engineer with 5+ years building B2B SaaS platforms. Specializes in Ruby on Rails backends, complex third-party integrations, and AI-powered product features, with end-to-end ownership across APIs and infrastructure.

TECHNICAL SKILLS

- **Backend:** Ruby on Rails, PostgreSQL, Redis
- **Frontend:** Vue.js, React, TypeScript
- **DevOps:** AWS, Terraform, Docker, CI/CD
- **Integrations:** CRMs, LLMs, payments, reporting

WORK EXPERIENCE

Innovandio GmbH — Senior Software Engineer Oct. 2023 - March 2026 (Berlin)

- Architected backend systems and integrations (Twilio, APNs, FCM, Microsoft Graph API, Power BI, Timecard, POS payment terminals) for a multi-service Rails platform powering 30+ car wash and gas stations across Germany and Austria, serving 3,000+ users
- Engineered CI/CD pipelines on AWS and GitHub Actions with Docker and SonarQube quality gates, reducing deployment failures and release times
- Built an AI-powered billing pipeline integrating GitHub, calendar, video call, and project management data that automated client reporting and reduced it from a full day per month to 10 minutes per week
- Developed custom Angular plugins on top of OpenProject's Rails backend for Mercedes-AMG, covering agenda management, meeting minutes, and PowerPoint exports

Tech Stack: Ruby on Rails, Matestack, PostgreSQL, Redis, Vue.js, Angular.js, Terraform, AWS

Demodesk GmbH — Full Stack Software Engineer / Team Lead Feb. 2022 - Sept. 2023 (Munich)

- Led a team of ~10 engineers maintaining core backend services for a B2B SaaS platform used by 20,000+ users
- Reduced engineering backlog by ~40 percent during team lead period while maintaining continuous feature delivery
- Worked in a cross-functional feature team that integrated Google Meet to the platform
- Owned scheduling, Salesforce/HubSpot/Pipedrive integrations, user onboarding, and core video workflows
- Shipped features end to end, from system design to production deployment
- Refactored core modules and reduced codebase complexity by ~15 percent

Tech Stack: Ruby on Rails, Vue.js, PostgreSQL, Redis, Terraform, Gitlab, AWS

Setting HQ — Ruby on Rails Engineer Intern Oct. 2020 - Feb. 2022 (Berlin)

- Optimized the platform's Office Search functionality, reducing page load times by 45%.
- Developed an office onboarding system, digitizing a previous manual and error-prone system
- Eliminated legacy dependencies by migrating the platform to a modern system architecture

EDUCATION

Technische Universität Berlin 2018 - 2022
B.Sc. Business Informatics Wirtschaftsinformatik
